

FCC should not implement any proposal to lessen Indiana's Telephone Privacy law protection. Indiana's telephone law protection has DRAMATICALLY improved my time at home. I work all day and was tired of not having private time and peaceful dinner time with my family due to the telemarketing harassment through the phone. This is a real invasion into people's private life. Our home has to be a "safe haven" from the aggressions of the outside world. I hope that the government does not let those that don't respect the privacy of the individuals to invade our homes. If the government does not protect us, who will???? Indiana's Telephone Privacy law has improved my life at home as well as my family's. We used to get around 15 to 20 calls per week. Most of those calls were during our precious time together, when we are trying to unwind from our busy lives and have some quality time together. Indiana's Telephone Privacy law has made a HUGE difference in our lives. The phone doesn't ring as much, and when it does, we know it is from family or friends. Our life quality has improved a lot. I would like that the phone privacy law stays as it is. I never buy or accept any solicitation by phone and want to have the option to stop those who want to harass me at home to get what they want. People who like to buy through telemarketing, always have the option to be out of the no call list. Indiana's Telephone privacy Law is working well for the community, please, do not let abusers influence you or remove it. I count on your support. Thank you.
